REIDIN-UAE RESIDENTIAL PROPERTY PRICE INDICES METHODOLOGY & COVERAGE

REIDIN UAE Residential Property Price Indices (RPPIs) are designed to be a reliable and consistent benchmark of housing sales and rent prices in Dubai, Abu Dhabi, Ajman, Ras Al Khaimah and Sharjah. The purpose of the indices is to measure the average differences in house prices in a particular geographic market through a timeline.

Methodology and Coverage

Monthly REIDIN UAE RPPIs are calculated based on moving average median prices– an approach that is widely used for indexing housing prices – which involves median of sales and rent prices of properties in a corresponding region. The median series of sales and rent price data is constructed by taking “the median price/sqm” of all properties during a certain time period.

The official UAE Real Estate Residential Sales Price Indices provided to Bank of International Settlements (BIS) by the Central Bank of United Arab Emirates (CBUAE) is designed and produced by REIDIN.
